### About This Content

#### This pack includes:

- Unique armored vehicle 'Bloodhound';
- Vehicle weapon - 2 'Sledgehammer' shotguns;
- Unique character portrait: 'Aleph';
- Paint can: Dark red, Pattern: Scorched Earth;
- 1500 in-game coins;
- Number of vehicle parts rises to 55.

After purchase and return to garage the game will offer you to automatically create new vehicle. You can also do this later - open blueprints menu, pick the vehicle and press "Load".

Purchasing a pack gives the player early access to some structural faction parts. These parts will become available immediately upon purchase and are not re-issued once the corresponding reputation level is reached. For some parts you can only have one set of them on the account. When purchasing multiple packs with same parts they do not stack!

---

Coins - is an in-game currency, which is used to buy vehicle parts from other users in the market and to pay the rent for the workbench to produce new parts. Note! If you purchase several packs, coins included in them stack!

crossout wasteland warrior pack

Many things improve from Sparkle 2 Evo. Visual is good, Sound is good (thought it make you sleepy sometimes), More quests, More parameter.

The stages are more challenge but enemy are fewer than Sparkle 2 Evo.

Ending make me little disappointed but still a good game.. It feels like someone invented the time machine, transported id Software team from 1992 to present day, gave them modern technology, and then they made this game.

All elements are there, like back in the day. It counts your score, died enemies don't disappear, there's a lives system, but this time a meaningful one - it allows you to respawn without losing progress unlike useless thing inferior to quickload we had before. And I even became interested in this game after playing shareware Episode 1!

AI is challenging. Enemies are able to predict where you're moving and shoot there, giving sense of accomplishment when you manage to overcome a hard battle.

The game is powered by DarkPlaces engine which is based on id technology, and it shows. Level editor gives you a set of primitives you can cut, shape and bend plus set of texture atlases instead of several pre-made models like engines do today. Thanks to it, levels are as interesting and imaginative as in other idTech-powered masterpieces such as Quake3, Quake4, Doom3, Prey.

And a feel of playing something of id Software quality wouldn't be there without modding tools, which are well designed. There's a NetRadiant editor to make new locations, and SandStorm editor to make missions. SandStorm is a wonderful idea: it allows you to place enemies, objects, triggers etc. in a separate file and test your mission instantly without waiting for a lengthy lightmap compilation. This approach also opens the door towards having multiple missions taking place on the same map to fully utilize its potential.

Excellent usage of the engine and classic design which make it feel like playing an old-school id Software release are an amazing accomplishment for a small indie team. If you're looking for a game that can make you relive the feelings from the 90s, you've just found it.. so disappointing. 2/10.

this game was lovely on the xbox 360 and had many an hour of fun on local split screen plundering and mocking each other in various pirate accents.

the Pc vewrsion however does not have controller support or allow for local multiplayer, resulting in effectively a game that has 3 levels against an AI.

very disappointing. This game was free and I still want a refund. I love this one and high praise to the developer(s) for their first entry onto Steam with this really fun and unique action game!

[It starts off pretty difficult but if you are patient, you'll be rewarded with some really fun and high adrenaline retro arcade gaming fun here with BlamBox! This game runs very smooth on my 3 year old gaming pc netting over 500 fps. is 100% mouse controlled so no worrying about what keys to use and it's a blast to play!](#)

[Definitely recommended and well worth the asking price here! Don't miss out if you enjoy these kinds of games! 9 out of 10. DragoDino is a fun and cute rogue-lite platformer. I enjoyed playing through the game and unlocking what content the game has to offer. I also greatly appreciate the split screen cooperative play and Linux support. While this game feels rather difficult at first, it starts to feel too easy \(especially for the rogue-lite genre\) as you get more experienced. I would purchase a sequel to this title if it had some improvements. Most notably, some things I think would greatly enhance this game include: a. More powerups, b. More levels \(ie. harder levels\), c. More bosses, d. More comprehensive unlock system, e. An easier difficulty "casual" to play with friends who are not veterans of the rogue-lite genre.. I know that many reviews of under 2 hours game play are discounted as rage quitters and the like. However I am not happy with this purchase even though it was \\$5.00 and feel a need to review this.](#)

[No tutorial - What do I do? How do I do it? What do the mystery icons mean on my UI?](#)

[Combat - Can't shoot a deer at any distance with my bow - even point blank ><](#)

[Looting - Killed a deer. It has meat. There is no obvious way to transfer it to my inventory.](#)

[Movement - Very laggy, floating, half in rock.](#)

[My system plays Empyrion and 7D2D on top graphics settings with only occasion lag. Most disappointing purchase on steam to date.](#)

My first impression of this game was one that wasn't fair to the developer and the game itself. I had issues in the beginning and only after speaking with the developer and actually playing the game did I realize that this game is SUPER FUN and I recommend getting it!! It has AMAZING potential and I hope to see this game BOOM!!!

I appreciate the developer getting back to me on this issue. Much respect there it shows true dedication. Also I have to say that after I tried playing the game again it worked fine. The game is early access so it comes with the usual things that are pretty normal, for example: the game runs pretty smooth but something I'd like is the option to invert the camera, I'm a strange one and I can't play without inverting the Y axis. I can't wait to see what the new models for the characters look like and I hope that this game continues to grow. I love ghosts and I love the concept of this game!!!. Really cute and fun Visual Novel. Indie Game of The Year 2016. What the hell did I just buy?. It's a refreshing game to play if you just want to relax for a few minutes. It's pretty emotional but very short and the ending doesn't have any scenes, a choice is made and you go back to the title screen.

it would of been nice to see if she actually does eat his head or not but you never find out in the two play throughs I made.

At it's current state it isn't worth money but I am still giving it a positive rating because I don't want to punish a developer for trying something new.. Do you like hurting other people?

Who is stuffing you in these cages?

Where are you hiding banana!?

\*unintelligible monkey-noises\*. Very good game, I have no complaints
